

# AIRSPACE INTEGRATION WEEK MADRID

SUPPORTED BY

MADRID  
CONVENTION  
BUREAU

The Air Traffic Control Association is proud to host **Airspace Integration Week Madrid**, the only event of its kind, showcasing all aspects of airspace integration.

Airspace Integration Week Madrid is a four-day event that features exhibits, live demonstrations, programming, networking, and professional development. Taking place in Madrid from 25-28 September at IFEMA Feria de Madrid and Cuatro Vientos Airport.

**Airspace Integration Week Madrid** is the place to be if you are interested in airspace management including ATM, UTM and STM, in AAM and UAS, civil-military cooperation and space activities.

Madrid

Support for Airspace Integration Week Madrid

Supported by EUROCONTROL, Federal Aviation Administration, European Defense Agency, NATO's Armament and Aerospace Capability Directorate, U.S. Air Force, National Aeronautics and Space Administration, Madrid City Hall, Convention Bureau of Madrid, ENAIRE, Indra, Raytheon, INECO, General Dynamics Mission Systems, HENSOLDT, AESA, and Senasa.

*"ENAIRE fully supports Airspace Integration Congress as the key space of convergence for the sector in Europe, bringing together key players from Air Traffic Management, Commercial Space, Civil-Military Cooperation and Drones at the same scenery. Facilitating a point of junction essential for the safety and continued growth of this new industry sector."*

**Angel Luis Arias, Director General of ENAIRE**

## **Airspace Integration Week Madrid is composed of three integrated and coordinated events:**

### **Airspace Integration Congress:**

A worldwide gathering of stakeholders involved in all aspects of airspace integration. Featuring a 14,000 square meter exposition at IFEMA with exhibits and six theatres dedicated to programming on airspace management and integration, advanced air mobility, unmanned aircraft systems, innovation, civil-military cooperation, air traffic management, and counter-UAS operations. Programming then transitions to Cuatro Vientos Airport for the latter part of the week focusing on the practical usage in current airspace operations.

### **Expodrónica Air Show:**

Manned, unmanned, and space industries come together into a unique live experience at IFEMA in the Expodrónica AAM/UAS Theatre and at Cuatro Vientos Airport. Exhibits, presentations, hardware and software demonstrations, and airshows will integrate into an unprecedented experience for all attendees.

### **World Space Summit:**

This innovative summit will integrate stakeholders involved in space activities, including governmental, and industrial organizations. Programming will take place both in IFEMA and Cuatro Vientos and will include proposed legislation, projects and cooperation, startups and industry leaders, round tables with space agencies and defense departments, debates about sustainability and telecommunications, and many others.

We are building the future of airspace today! Mark your calendars to be a part of the largest event in the world on airspace integration.
